

# **Material Safety Data Sheet**

Clario Foaming Hair and Body Shampoo

## 1. Product and company identification

| Due du et a ence     | · Olaria Esperies Usis and Dady Observace  |
|----------------------|--|
| Product name         | : Clario Foaming Hair and Body Shampoo   |
| Supplier             | : Betco Corporation<br>1001 Brown Avenue<br>Toledo, Ohio 43607<br>(800) 333-2156 |
| Synonym              | : Not available.   |
| Trade name           | : Not available.   |
| Material uses        | : Not available.   |
| Manufacturer         | : Betco Corporation<br>1001 Brown Avenue<br>Toledo, Ohio 43607                   |
| Code                 | : 758  |
| MSDS #               | : 758  |
| Validation date      | : 6/14/2013.   |
| Print date           | : 6/14/2013.   |
| In case of emergency | : Chemtrec (800) 424-9300  |
| Product type         | : Liquid.  |

## 2. Hazards identification

| Emergency overview           |   |                   |  |  |  |
|------------------------------|---|-------------------|--|--|--|
| Physical state               | .iquid.   |                   |  |  |  |
| Color                        | Amber.  |                   |  |  |  |
| Odor                         | Pleasant.   |                   |  |  |  |
| Signal word                  | CAUTION!  |                   |  |  |  |
| Hazard statements            | CAUSES EYE IRRITATION. MAY BE HARMFUL IF SWALLOWED. CONTAIN:<br>MATERIAL THAT MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIM.<br>DATA.  | -                 |  |  |  |
| Precautionary measures       | Do not handle until all safety precautions have been read and understood. Obtais pecial instructions before use. Do not breathe vapor or mist. Do not ingest. Do eat, drink or smoke when using this product. Avoid contact with eyes, skin and or Jse personal protective equipment as required. Wash thoroughly after handling. | o not<br>lothing. |  |  |  |
| Routes of entry              | Eye contact. Ingestion.   |                   |  |  |  |
| Potential acute health effec |   |                   |  |  |  |
| Inhalation                   | lo known significant effects or critical hazards.   |                   |  |  |  |
| Ingestion                    | Harmful if swallowed.   |                   |  |  |  |
| Skin                         | May cause skin irritation.  |                   |  |  |  |
| Eyes                         | Severely irritating to eyes. Risk of serious damage to eyes.  |                   |  |  |  |
| Potential chronic health eff |   |                   |  |  |  |
| Chronic effects              | Contains material that may cause target organ damage, based on animal data.   |                   |  |  |  |
| Carcinogenicity              | lo known significant effects or critical hazards.   |                   |  |  |  |
| Mutagenicity                 | No known significant effects or critical hazards.   |                   |  |  |  |
| Teratogenicity               | lo known significant effects or critical hazards.   |                   |  |  |  |
| Developmental effects        | lo known significant effects or critical hazards.   |                   |  |  |  |
| Fertility effects            | lo known significant effects or critical hazards.   |                   |  |  |  |
| Target organs                | Contains material which may cause damage to the following organs: skin, eyes.   |                   |  |  |  |
| Over-exposure signs/symp     |   |                   |  |  |  |
| Inhalation                   | Not determined.   |                   |  |  |  |
| Ingestion                    | Not determined.   |                   |  |  |  |

| 2. Hazards identification                             |  |  |  |  |  |
|---|--|--|--|--|--|
| Skin  | : Adverse symptoms may include the following:<br>irritation<br>redness   |  |  |  |  |
| Eyes  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |  |  |  |  |
| Medical conditions<br>aggravated by over-<br>exposure | : Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product. |  |  |  |  |

See toxicological information (Section 11)

## 3. Composition/information on ingredients

| Name                        | CAS number | %       |
|-----------------------------|------------|---------|
| sodium dodecyl sulphate     | 151-21-3   | 1 - 5   |
| Sodium lauryl ether sulfate | 9004-82-4  | 1 - 5   |
| ETHYL ALCOHOL               | 64-17-5    | 0.1 - 1 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

### 4. First aid measures

| Eye contact                | : Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately. In case of contact with eyes, rinse immediately with plenty of water.  |
|----------------------------|---|
| Skin contact               | : Wash skin surfaces thoroughly after contact. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.   |
| Inhalation                 | : Move exposed person to fresh air. If not breathing, if breathing is irregular or if<br>respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.<br>Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention<br>immediately.   |
| Ingestion                  | : Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Notes to physician         | <ul> <li>No specific treatment. Treat symptomatically. Contact poison treatment specialist<br/>immediately if large quantities have been ingested or inhaled.</li> </ul>  |

## 5. Fire-fighting measures

| Flammability of the product | : In a fire or if heated, a pressure increase will occur and the container may burst.   |  |  |  |  |
|-----------------------------|---|--|--|--|--|
| Extinguishing media         |   |  |  |  |  |
| Suitable                    | : Use an extinguishing agent suitable for the surrounding fire.   |  |  |  |  |
| Not suitable                | : None known.   |  |  |  |  |
| Special exposure hazards    | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |  |  |  |  |

## 5. Fire-fighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>metal oxide/oxides                             |
|--|---|
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| Special remarks on fire hazards                | : Not available.  |
| Special remarks on explosion hazards           | : Not available.  |

## 6. Accidental release measures

| Personal precautions      | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment (see Section 8).  |
|---------------------------|---|---|
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods for cleaning up   |   |   |
| Small spill               | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill               | : | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |

## 7. Handling and storage

| Handling | Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Avoid exposure - obtain special instructions before use. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|----------|--|
| Storage  | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.   |

## 8. Exposure controls/personal protection

| Occupational exposure limits |   | TWA (8 hours)               |                             |             | STEL (15 mins)                 |                  |                  | Ceiling          |                  |             |           |
|------------------------------|---|-----------------------------|-----------------------------|-------------|--------------------------------|------------------|------------------|------------------|------------------|-------------|-----------|
| Ingredient                   | List name   | ppm                         | mg/m³                       | Other       | ppm                            | mg/m³            | Other            | ppm              | mg/m³            | Other       | Notations |
|                              | US ACGIH 2/2010<br>AB 4/2009<br>BC 9/2010<br>ON 7/2010<br>QC 6/2008 | -<br>1000<br>-<br>-<br>1000 | -<br>1880<br>-<br>-<br>1880 | -<br>-<br>- | 1000<br>-<br>1000<br>1000<br>- | -<br>-<br>-<br>- | -<br>-<br>-<br>- | -<br>-<br>-<br>- | -<br>-<br>-<br>- | -<br>-<br>- |           |

#### Consult local authorities for acceptable exposure limits.

| Recommended monitoring procedures          | : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.  |
|--|---|
| Engineering measures                       | <ul> <li>If user operations generate dust, fumes, gas, vapor or mist, use process enclosures,<br/>local exhaust ventilation or other engineering controls to keep worker exposure to<br/>airborne contaminants below any recommended or statutory limits.</li> </ul>  |
| Hygiene measures                           | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period. Appropriate<br>techniques should be used to remove potentially contaminated clothing. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety showers<br>are close to the workstation location. |
| Personal protection                        |   |
| Respiratory                                | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.   |
| Hands                                      | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.   |
| Eyes                                       | <ul> <li>Safety eyewear complying with an approved standard should be used when a risk<br/>assessment indicates this is necessary to avoid exposure to liquid splashes, mists or<br/>dusts.</li> </ul>  |
| Skin                                       | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before handling<br/>this product.</li> </ul>   |
| Environmental exposure controls            | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.  |
| Other protection                           | : Not available.  |
| Personal protective equipment (Pictograms) | : Not available.  |

## 9. Physical and chemical properties

| Physical state            | : Liquid.                     |
|---------------------------|-------------------------------|
| Flash point               | : Closed cup: Not applicable. |
| Burning time              | : Not applicable.             |
| Burning rate              | : Not applicable.             |
| Auto-ignition temperature | : Not available.              |
| Flammable limits          | : Not available.              |
| Color                     | : Amber.                      |
| Odor                      | : Pleasant.                   |
| Taste                     | : Not available.              |
| Molecular weight          | : Not applicable.             |
| Molecular formula         | : Not applicable.             |
|                           |                               |

## 9. Physical and chemical properties

| ÷  |  |

- Other adverse effects : No known significant effects or critical hazards.

## 13. Disposal considerations

| Waste disposal | : The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
|----------------|--|
| Waste stream   | : Not available.   |

#### RCRA classification

: Not available.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
